

Educational Tour 2023-24

Kuruom Vidyalaya has organized an educational tour for grade 6 to 12 to the Blue World Water Park as part of the extracurricular activities aimed at providing students with a blend of recreation and learning. The tour was organised on Nov. 2nd, 2023. It was an exciting and educational experience for all students along with the teachers.

It was very well executed with all planning by the School Principal and her teaching staff. For this, the students, along with teachers and school principal Mrs. Shagufa Afzal gathered in the school premises early morning at 5 AM. The students were extremely excited for the tour that they have been started gathering from 4 am at premises. The journey to the water park was quiet comfortable, and very much enjoyed by the students. The students' enthusiasm was palpable as they eagerly anticipated the day ahead.

Upon arrival, the students were briefed on the various aspects of water conservation and the ecological importance of maintaining clean water resources. This introductory session aimed to connect the recreational aspect of the trip with educational elements. The importance of water safety and the principles of buoyancy were also emphasized, aligning with the curriculum's science objectives.

The water park provided a variety of attractions, including water slides, wave pools, and lazy rivers. These activities not only offered students an opportunity for physical activity but also fostered team building and social interaction. Teachers ensured that safety guidelines were strictly followed, and lifeguards were present to supervise water-based activities.

After the activities the lunch was organised by the school authorities at the park's premises.

The students exhibited a high level of engagement throughout the day, combining learning with fun seamlessly. The interactive sessions and hands-on experiences enriched their understanding of water-related concepts. Teachers noted the positive impact of experiential learning on students' retention of information and their ability to apply theoretical knowledge in practical situations.

In the last School Principal Mrs. Afzal addressed the teachers and students, She said that the educational tour to the water park was a resounding success, achieving its dual purpose of recreation and learning. Such excursions play a crucial role in enhancing the overall educational experience and fostering a well-rounded development for our students.

The students returned with smiles on their faces, having enjoyed a day filled with adventure and valuable educational insights. They expressed their gratitude to the school administration, teachers, and everyone involved in organizing this memorable educational tour.
